Business Etiquette Tips Source: www.ezinearticles.com

1. When speaking, use a calm and even voice and a volume to suite the business situation
2. Squarely face the person you are speaking with and avoid turning your body away from that person. This behavior can be insulting and very negative.
3. When drinking a beverage, always hold in your left hand. This enables you to shake someone's hand with your right hand. And it will not be cold or wet!
4. Always respect the persons "comfort zone" which is about 3 feet around the persons body. No close talkers please!
